

## Project : Ronald McDonald Foundation

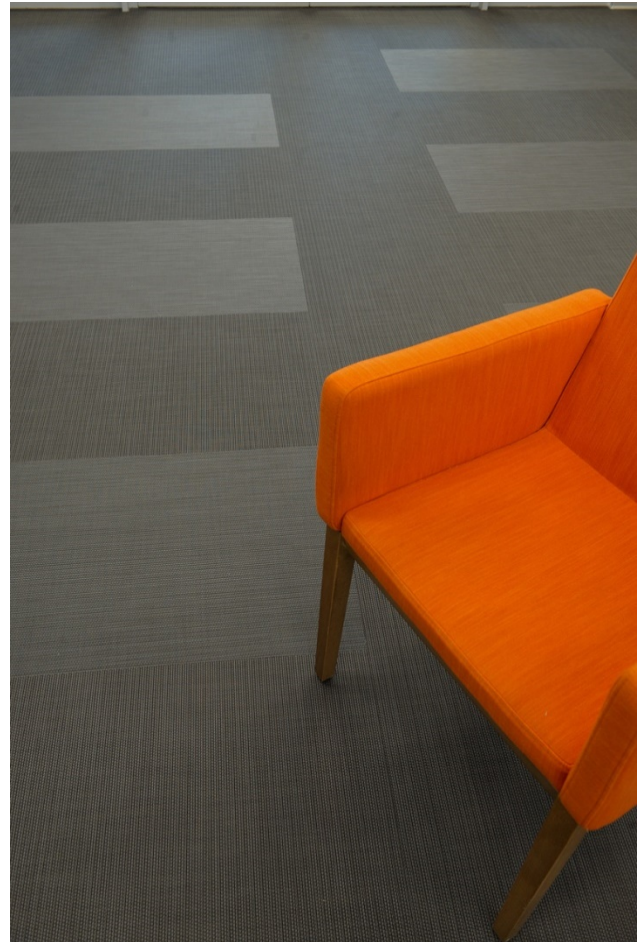

Location: Krakow - Poland

Reference: Fluctuation U530 rolls

The **Ronald McDonald Foundation** helps families better cope with difficult situations, through houses that allow parents of sick children to stay close to the places of their hospitalization. Children thus retain a decisive emotional balance for the quality of their healing. The Ronald McDonald Foundation also supports many associations acting on behalf of children and their families.

For the renovation of the premises in Poland, Dickson woven vinyl flooring **Be Different Fluctuation U530** was chosen. And we are proud to be part of such great institution.
